

Speedstar 1™

MANUAL OVERWRAPPER

FEATURES:

- Most favorable unit to start professional manual wrapping
- Manual device
- Favorable acquisition costs
- Flexible
- Innovative
- Wraps Jewel and DVD cases
- Up to 200 wrapped units per hour
- Top quality wrapping
- Uses polypropylene roles

Save time and money with the overwrappers of the Speedstar series. The Speedstar 1 ist the most favorable device for getting started with professional manual wrapping. In contrast to the half automatic Speedstar Pro you only have to seal single seams.

If you compare the Speedstar series with other models you will quickly realise the enormous differences in costs. However you don't have to compromise when it comes to quality.

Never has there been a professional overrapper available at such an affordable price. Instead of using single pre-cut transparencies the Speedstar uses industrial manufactured polypropylene rolls, reducing your costs to a fractional amount.

Speedstar 1TM
